

Final Exhibits 2: Offline Activation

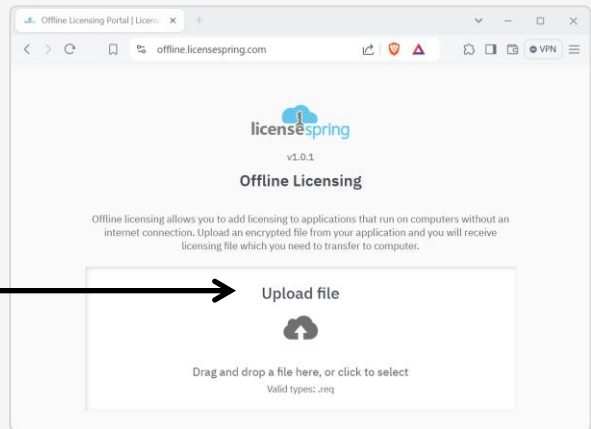

- 1 Enter your License Name and Key information and click **“Generate Request File”**

- 2 Copy the resulting **“ls_activation.req”** file, opened in File Explorer, to another computer that has an internet connection.

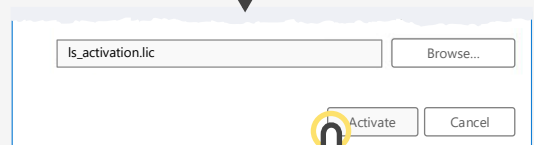

- 3 On that computer, go to <https://Offline.LicenseSpring.com> and upload the **“ls_activation.req”** file, as instructed.

- 4 You will download a file named **“ls_activation.lic”**. **Copy this file back** onto the computer you are trying to activate.

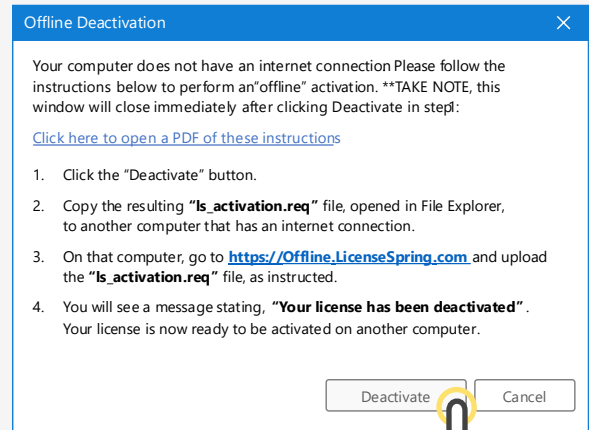

- 5 Click Browse and select the **“ls_activation.lic”** file.

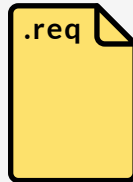

- 6 Click **Activate**, making sure the License Name and License Key fields are populated.

Final Exhibits 2: Offline Deactivation

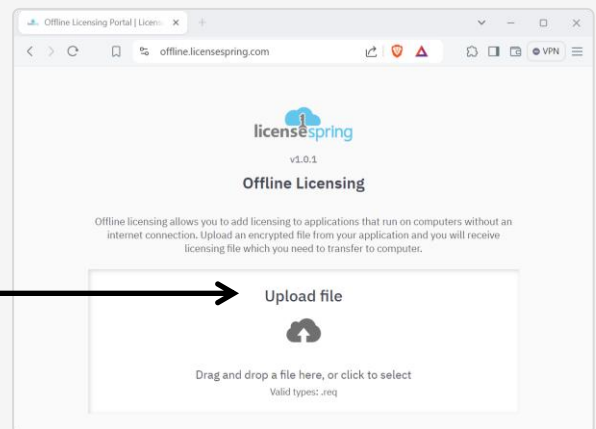

1 Click the "Deactivate" button.

2 Copy the resulting "ls_activation.req" file, opened in File Explorer, to another computer that has an internet connection.

3 On that computer, go to <https://Offline.LicenseSpring.com> and upload the "ls_activation.req" file, as instructed.

4 You will see a message stating, "Your license has been deactivated".

Your license is now ready to be activated on another computer.
